

# ALL EPIC STORIES:

## **Customer Online Order (COO):**

As a customer I should be able to choose my food and drinks online, customize the ingredients and then be notified when the order is ready so I can collect it.

## **Staff Service Order (SSO):**

As a staff member, I should be able to view all the online orders and be able to accept new orders and update the order's status once the order is ready.

## **Staff Maintenance Inventory (SMI):**

As a staff member, I should be able to have inventory levels displayed to me so I know when I need to refill the stock. Inventory levels should also be automatically adjusted as orders are made and when ingredients run out customers shouldn't be able to order them.

Note: 1 Story Point (1 SP) = 1/4 of a day

## Epic Story 1:

**As a customer I should be able to choose my food and drinks online, customize the ingredients and then be notified when the order is ready so I can collect it.**

ID	UC1
<b>Name</b>	Website connection
<b>Description</b>	As a customer I want to be able to view the food items online so that I decide which items I want to buy.
<b>Acceptance Criteria</b>	Test1 - Typing in the company web address into a connected internet browser should load the web page.  Test2 - The homepage should have a link that once clicked leads to a page which allows the customer to view items.
<b>Priority</b>	1
<b>Size</b>	2 SP

ID	UC2
<b>Name</b>	Food variety
<b>Description</b>	As a customer I should be able to order multiple items of food and drink so I can consume what suits my needs.
<b>Acceptance Criteria</b>	<p>Test1 - Clicking on different tabs of "mains, sides, and drinks" should load up separate pages displaying different categories of food.</p> <p>Test2 - The user should be able to select however many items he wants and in whatever quantity if ingredients are available and item is valid.</p> <p>Test3 - Clicking add to order will add any selected items into my order.</p>
<b>Priority</b>	1
<b>Size</b>	4 SP

ID	UC3
<b>Name</b>	Ingredient options
<b>Description</b>	As a customer I want to be able to customize the ingredients on my order so I can have as much control over the food to be ordered.
<b>Acceptance Criteria</b>	<p>Test1 - When building the main (burger or wrap) ingredients should have the option to be taken away or added.</p> <p>Test2 - Option to add or remove ingredients should be taken away if there's too little or too many ingredients of the same type.</p>
<b>Priority</b>	2
<b>Size</b>	3 SP

ID	UC4
<b>Name</b>	Size options
<b>Description</b>	As a customer I want to be able to select different sizes of drinks and sides so I can order a size that suitably satisfies my appetite.
<b>Acceptance Criteria</b>	<p>Test1 – drinks can be added to an order in size small</p> <p>Test2 – drinks can be added to an order in size medium</p> <p>Test4 – drinks can be added to an order in size large</p> <p>Test4- a small medium and large drink can be added to the same order</p> <p>Test5- Asking for a size not on the menu returns the error “invalid size”</p>
<b>Priority</b>	3

<b>Size</b>	2 SP
-------------	------

ID	UC5
<b>Name</b>	Generate order ID
<b>Description</b>	As a customer I want to receive an order ID so I can view my order status.
<b>Acceptance Criteria</b>	<p>Test1 – When a first order is created it has ID 0</p> <p>Test2 – when a second order is created it has ID 1</p> <p>Test3 – Appending the order ID to the web address should bring up a session with the details of that order.</p> <p>Test4 – Giving an invalid order ID will return a message “Order Not Found”</p>
<b>Priority</b>	4
<b>Size</b>	2 SP

ID	UC6
<b>Name</b>	View current order
<b>Description</b>	As a customer I want to be able to view my order so I can see what I am going to order and its costs.
<b>Acceptance Criteria</b>	Test1 - Clicking on the order should bring up a new page showing all items in the order
<b>Priority</b>	8
<b>Size</b>	3 SP

ID	UC7
Name	Edit cart
Description	As a customer I want to be able to remove things from my order individually so that it is easy to edit my order.
Acceptance Criteria	<p>Test1 - On the order page, each item in the order should be able to be removed.</p> <p>Test2 – Removing an item will result in a reduce of the total cost of an order.</p> <p>Test3 – Removing an item from an order will result in the item no longer being in the order.</p> <p>Test4 – Removing an item from an order will result in its corresponding ingredients incrementing appropriately.</p>
Priority	9
Size	2 SP

ID	UC8
Name	Payment finalisation
Description	As a customer I want to receive a final total before finalising the transaction so I can determine if the final cost meets my budget.
Acceptance Criteria	<p>Test1 - When finalising payment a detailed breakdown and total cost should be displayed.</p> <p>Test2 - Any taxes or service charges should also be displayed on this order.</p>
Priority	7
Size	1 SP

ID	UC9
Name	Display costs
Description	As a customer I want to view the cost of every item displayed so I can know its cost before adding it to my order.
Acceptance Criteria	Test1 – The cost of an item is displayed after selecting necessary options for the item.
Priority	5
Size	1 SP

## Epic Story 2:

**As a staff member, I should be able to view all the online orders and be able to accept new orders and update the order's status once the order is ready.**

ID	UC10
Name	View orders
Description	As a staff member I should be able to access a staff only version of the system so I know which orders need to be fulfilled.
Acceptance Criteria	Test1 - URL link provided should display staff-only version of the website. Test2 - Dashboard on the website should display a link named "Incomplete orders".
Priority	4
Size	2 SP

ID	UC11
Name	Accept new orders
Description	As a staff member I want new orders to be put into the list of orders so I can keep track of all incoming orders.
Acceptance Criteria	Test1 – Submitted orders should appear on the list of incomplete orders.
Priority	2
Size	4 SP

ID	UC12
Name	Update order status
Description	As a staff member I want to be able to update the order's status once it's cooked so we know we can starting preparing another order.
Acceptance Criteria	Test1 - Order's status should change to "completed" when updated. Test2 - Order should be removed from the list of incomplete orders and moved to list of completed orders. Test3 - Attempting to update the status of an order that doesn't exist generates the error message "Order status error"
Priority	3
Size	2 SP

### Epic Story 3:

As a staff member, I should be able to have inventory levels displayed to me so I know when I need to refill the stock. Inventory levels should also be automatically adjusted as orders are made and when ingredients run out customers shouldn't be able to order them.

ID	UC13
Name	View Stock
Description	As a staff member, I should be able to view my stock levels so I can refill stock if needed.
Acceptance Criteria	Test1 – Staff should be able to view inventory levels.
Priority	2
Size	3 SP

ID	UC14
Name	Decrement stock
Description	As a staff member, I want the system to automatically decrement stock levels of the required ingredients of an order when the order is placed so I can accurate account for the stock levels.
Acceptance Criteria	Test1 -When an order is placed, stock levels of the ingredients used in the order should be decremented accordingly.
Priority	1
Size	3 SP

ID	UC15
Name	Prevent unavailable orders
Description	As a staff member, I want the system to prevent customers from placing orders requiring unavailable ingredients so they don't place an order that can't be provided for.
Acceptance Criteria	Test1 - When a customer attempts to select an item that has ingredients that are unavailable the system prevents the order and displays “Not enough {ingredient} in stock.”
Priority	3
Size	1 SP

ID	UC16
<b>Name</b>	Stock drinks and sides by volume and weight
<b>Description</b>	As a staff member, I want certain items to be stocked by volume or weight so that I can serve them in varying sizes.
<b>Acceptance Criteria</b>	<p>Test1 - The system should respectively display the volume/weight of each type of drink/side that is in stock.</p> <p>Test2 - The system should correctly decrement the correct volume/weight of an item in stock when an order is placed.</p>
<b>Priority</b>	4
<b>Size</b>	4 SP

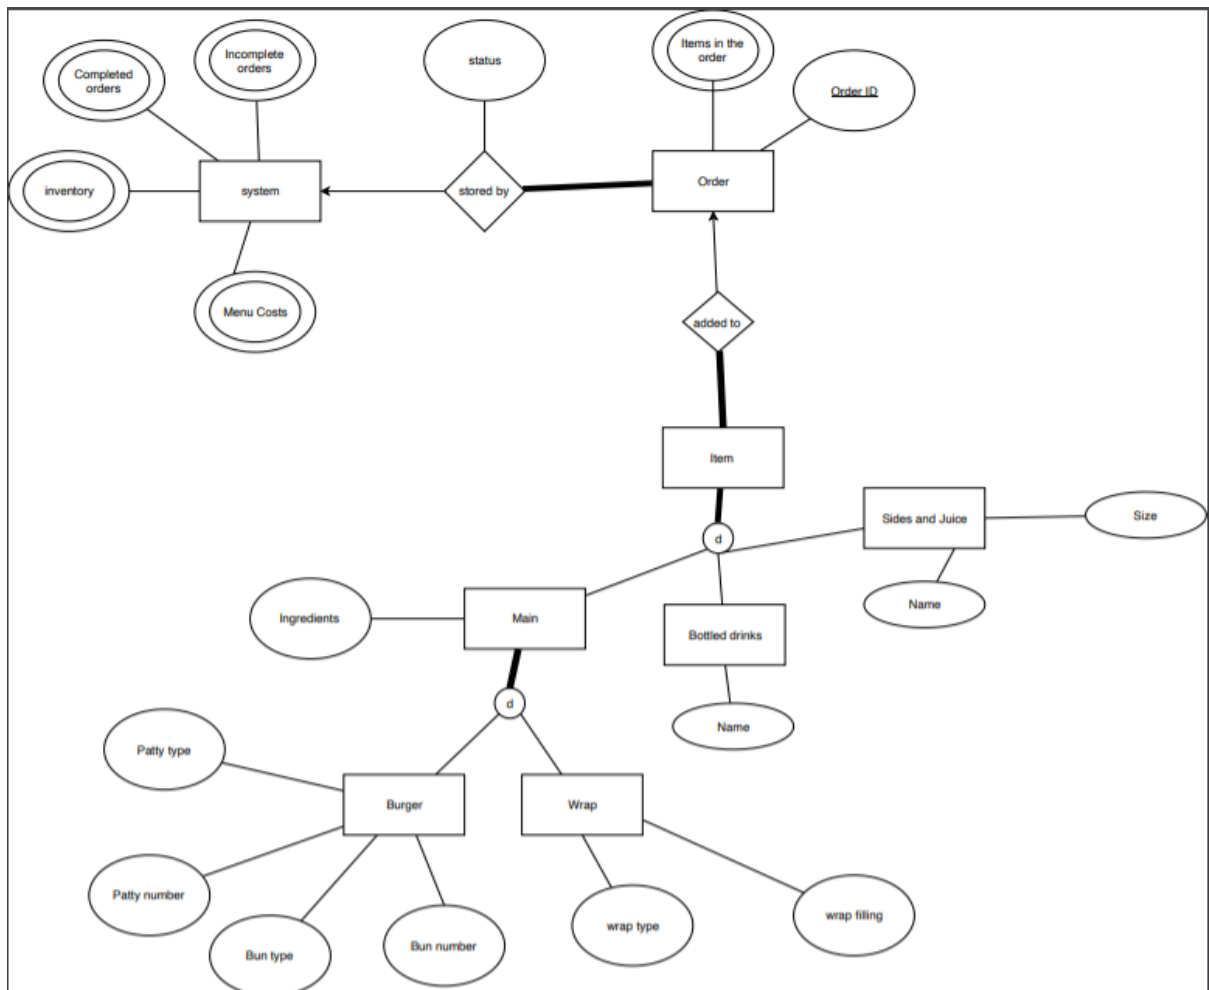

ID	UC17
<b>Name</b>	Sundaes
<b>Description</b>	As a customer I should be able to order Sundaes and so I can have a dessert to go with my meal
<b>Acceptance Criteria</b>	<p>Test1 – Clicking on “chocolate sundae” will add a chocolate sundae to my meal.</p> <p>Test1 – Clicking on “Strawberry sundae” will add a chocolate sundae to my meal.</p> <p>Test2 – Sundaes are listed as a side on the website.</p> <p>Test3 – Sundaes can be added to my cart in size small and the cost of my cart will be updated</p> <p>Test4 – Sundaes can be added to my cart in size medium and the cost of my cart will be updated</p> <p>Test5 – Sundaes can be added to my cart in size Large and the cost of my cart will be updated</p>
<b>Priority</b>	10
<b>Size</b>	2 SP

ID	UC18
<b>Name</b>	Default Burger

<b>Description</b>	As a customer I should be able to order a Default burger without having to select any ingredients so I can get an order quickly and easily
<b>Acceptance Criteria</b>	<p>Test1 – Clicking on Default burger will add a Beef burger on white bread with lettuce to my meal.</p> <p>Test2- attempting to add A default burger to an order with no lettuce in stock will generate an error saying “this item is unavailable”</p> <p>Test3- Adding a Default burger to a meal will increase the cost of an order by \$9</p>
<b>Priority</b>	9
<b>Size</b>	3 SP

## OO Diagram

## ER Diagram

## Log Book

### Meeting 04/03/19

- team members gathered and discussed the assignment
- Defined our epic user stories as a group
- explored how to use github with different branches and pushing and pulling
- decided on Wednesday afternoon as a free day for meeting up if needed.
- Method of communication will be Facebook

#### Tasks for next meeting

- Jack: Create Customer user stories
- Sandeep: Create Service User stories
- Zen: Create Maintain inventory user stories

#### Notes:

- see usersStories.txt for draft user stories

### Meeting 11/03/19

Milestone 1 submitted

#### Reflection

The user stories went well, each group member fulfilled their role as expected and completed all the tasks given to them.

#### Obstacles

Working on our various branches too much without pushing and pulling to master resulted in a large amount of conflict issues that required time to fix so we can merge again.

- Focused on lab work.
- Jack put in charge of log book

### Meeting 18/03/19

- Sandeep not present
- received feedback on user stories

#### Issues

- more focus on acceptance criteria needed
- some of the priorities need changing

change the ID's for the User stories

### **Meeting 25/03/19**

- crc cards made: see CRC appendix
- Created a basis for the UML Diagram
- Sandeep left the group
- Decided on menu and ingredients to be used as standard: see Dictionary\_of\_ingredients.txt

Tasks to be completed.

- Zen: UML Diagram touch up, CODE: Staff, customer, order
- Jack, work on logbook, CODE: system, food drinks and sides

### **1/04/19**

Received feedback on UML Diagram

Issues

- food items should not be in abstract class
- menu and ingredients should be available to the whole system
- customer and staff classes are not needed.

Notes on Functions

System

- submit order check ingredients number > inventory
- generate id based on lists and add to ID
- prepare order changes status but still in incomplete
- complete order moves it to completed order list update status
- view all orders prints/returns incomplete list and complete list.

Order

- items list of items
- id set id when made
- status, order, preparing complete
- calculate cost-add cost of every item in item
- add to order add item to list
- remove removes

set name appends it to customer list

Tasks to be completed:

Zen: make edits to UML Diagram, code item and its inheritance

Jack: Code System and Order

### **3/04/19**

UML Diagram presented by Zen

Discussed the messiness of the GitHub and decided to sort lab work and assignment work into folders

### **8/04/19**

Presentation of milestone 2 Went well

Issues

- Have less hard coding in things like sides and prices.
- Need better use of GitHub branches.
- Branches should be made and then deleted when finished with them.

Focused on Lab work

### **15/04/19**

Discussed roles for the front end implementation

Tasks to complete

- Jack: ER Diagram, Report and implementation of staff front end.
- Zen: Implementation of order front end and combing the work done.

Obstacles

- Not sure how to implement persistence.
